**MM:** Mean of the intralaboratory means    **SM:** Standard deviation of the intralaboratory means

$$s_w: \text{Mean intralaboratory standard deviation} \quad s_b: \text{Interlaboratory standard deviation} \quad SM = \sqrt{s_b^2 + s_w^2/4}$$

The laboratory mean values have been examined statistically to eliminate any outlying values. Where a "—" appears in the table it indicates that an outlying value has been omitted by either the Cochran or Grubbs test.

Approximate values for information: Fe 17.9%, O 0.6%, S 0.07%

The half width confidence interval C(95%) =  $\frac{t \times SM}{\sqrt{n}}$  where t is the appropriate Student's t value and n is the number of laboratories

For further information regarding the confidence interval for the certified value see ISO Guide 35:1989 section 4.

**DESCRIPTION OF THE SAMPLE**

This sample consists of material all passing a 150 µm aperture sieve. It is supplied only in bottles of 100g

**NOTE:** The contents of the sample bottle must be thoroughly mixed before use to avoid any possible segregation of different particle sizes.  
For the determination of tungsten a minimum sample weight of 0.5g. should be used.

### FURTHER INFORMATION

For information regarding the preparation, certification and supply of these European Certified Reference Materials (EURO-NORM-CRMs) and the use of the statistical information given on this certificate, please refer to Information Circulars No. 1 (ECISS) and No. 5 (ECSC), both of which are available from the national standards body in your country. (In the UK this is the BSI, 2 Park Street, London W1A 2BS).

Des informations complémentaires sur la fabrication, la certification et la distribution des Matériaux de Référence Certifiés Européens (EURO-NORM—MRC) ainsi que sur l'utilisation des informations statistiques données sur le certificat se trouvent dans les circulaires d'information No. 1 (ECISS) et No. 5 (CECA). On peut se procurer ces deux circulaires auprès des organismes nationaux de normalisation. (Pour la France: AFNOR, Tour Europe - Cedex 7, 92080 Paris La Défense).

Angaben über Herstellung, Zertifizierung und Bezugsmöglichkeiten dieser Zertifizierten Europäischen Referenzmaterialien (EURO-NORM-ZRM) sowie über die Anwendung der in diesem Zertifikat enthaltenen statistischen Daten finden sich in den Mitteilung en Nr. 1 (ECISS) und Nr. 5 (EGKS), beide zu beziehen durch die nationalen Normenorganisationen. (In Deutschland bei der Vertriebsstelle des DIN: Beuth-Verlag GmbH, Burggrafenstrasse 4-10, 1000 Berlin 30).
